# SAMMA

## Tape Cleaners by InDelt

Clean older videotapes quickly and thoroughly before digitizing. This is a robust tape cleaner and inspection system which utilizes multiple sensors to detect many common tape problems.

Everything from stuck hubs, to broken leader, to stretched or folded tape can be reported. It's the perfect solution for preparing older cassette tapes for migration.

**\$26,775 USD**

**BETACAM**

## Key Features

- Delicate cleaning of master tapes
- Three models for three cassette families:  
**3/4" U-Matic, Betacam, and VHS**
- Programmable Auto-mode for standalone, one button operation
- 2 Removable tissue units (Pellon)
- RS-232 compatible (includes metadata)
- Large display screen with Time Counter

**\$23,000 USD**

**U-matic**

**\$22,975 USD**

**VHS**

Media (videotape) has become the lens through which societies remember, interpret, communicate, and most importantly preserve the past.

This value is only realized when these tapes are carefully migrated as high-quality digital assets.

Don't take chances, be sure to clean and inspect your tapes before digitization. Then choose SAMMA for the simplest and cleanest path to preservation.

**TC-MATIC**  
**Videotape quality inspector & cleaner**
